As the summer heats up, you can be sure Californians have one thing on their minds: water. Yes, of course we're thinking about the beach and the pool, but as we slip back into drought conditions, drinking water is also top of mind. What is California doing to help water agencies ensure that drinking water is safe and plentiful?

Babcock Laboratories invites you to gain answers to this important question and others at our September TEAM Event! Attendees will hear from experts at the State's Division of Drinking Water: Christine Sotelo (Chief, CA ELAP) and Sean McCarthy (Section Chief, South Coast Section). Ms. Sotelo will provide an update on CA ELAP's transformation initiatives, in addition to efforts to adopt laboratory standards into the California Code of Regulations. Mr. McCarthy will discuss the Division's regulatory priorities for 2018, including the new notification levels for PFOA and PFOS, the 1,2,3-TCP MCL, and the latest developments on Lead and Copper, such as lead sampling in schools. We look forward to seeing you on September 20th for this informative event!

Featured Presenters:

Christine Sotelo
Chief
Environmental Laboratory Accreditation Program (CA ELAP)
Division of Drinking Water
State Water Resources Control Board
"California ELAP Update"

Sean McCarthy
Section Chief, South Coast Section
Division of Drinking Water
State Water Resources Control Board
"California Drinking Water Regulatory Update"
